

# OUTPAK WASHOUT

## Keep your site clean and compliant

The Corrugated Concrete Outpak Washout is designed to be a portable and cost-effective solution for on-site washouts.

The water treated Kraft fiber board may be light but it is mighty! It is strong enough to handle concrete, stucco, sediment, dry wall mud and mortar. The pre-treated board can last the duration of short-medium length projects.

### Installation takes minutes.

Simply unfold the washout, line it with the provided poly and you're ready.

When the site is complete, properly dispose of the waste and reuse the Washout as necessary.

**Don't get stuck with costly compliance fines. Clean up with the Corrugated Concrete Outpak!**

### Two Available Sizes:

6' x 6' x 12"

(Capacity 1.33 cubic yards /260 gallons)

30" x 30" x 14"

(Capacity 0.25 cubic yards /50 gallons)
