

T-Post

Specifications

Material: Posts are produced from standard “T” rails weighing 91 lbs/yd or more according to ASTM A702.

Finish: Posts are either painted with baked green enamel, hot dip galvanized per ASTM A123, or unfinished.

Studded “T” Posts: The weight of each post is 1.33 lbs/ft. Studs are spaced uniformly along the length of the “T” shaped post.

Anchor Plates: Standard on 1.33 lbs/ft Studded “T” Posts, securely swaged on the studs.

Wire Fasteners: Five pre-formed wire fasteners are included with each painted “T” post. Fasteners are not required with “U” Posts.

Bundling: Painted posts are banded in 5 piece subbundles in 200 piece master bundles, on blocking.
