

NeutraLime™ Dry – pH Modification

Designed to quickly modify soil pH within 3-7 days

Correct your soil pH to dramatically improve nutrient uptake and sustainable growth:

- ProPlus® NeutraLime™ quickly neutralize acidic soils, promoting more complete germination and improving nutrient uptake
- Fast-acting Calcium Carbonate (CaCO₃) works in 3-7 days raising pH and lasts for up to 18 weeks
- Agricultural Lime (Ag Lime) coarse granules require 4-10 months to activate
- Improves nutrient uptake and enhances plant establishment
- For best results, use NeutraLime in conjunction with slow release agricultural lime for sustained neutralization

Benefits of Managing Acidic Soils:

- ▶ Eliminates most major problems associated with acid soils
- ▶ pH below 5.5 detrimental to nitrogen availability
- ▶ Provides calcium and magnesium to the soil
- ▶ Macronutrients more available for plant growth
- ▶ Increases the availability of nitrogen by speeding up the decomposition of organic matter
- ▶ Liming materials are relatively inexpensive
- ▶ Maintenance program required for pH <5.0
